

KLOVE radio serves me and my fellow community residents in many ways. It uplifts my day, encourages me, and keeps me informed of important news around the world. If KLOVE were replaced with a LPFM broadcaster it would not provide what KLOVE is now providing. Doing this would truly not be in the communities interest. I know this because since this station is a listener supported station, if they were not getting the funds from the listeners to keep it operating it would already be shut down; however, the station is still operating and changing lives every minute or every day. Thousands come to know Christ through this broadcast and taking it away would definitely not be in the interest of this community. I appreciate your time and please consider this. Thanks!
